Typical Performance

Application:

The **VANEC** Model 317 Intake Silencer is designed for use in suppressing the intake noise from high speed blowers, fans, engines and centrifugal air handling devices with an atmospheric suction.

The Model 317 Intake Silencer, when properly applied, will reduce intake noise to a community acceptable level for dwellings located further than 800 ft. from the intake opening. Silencer performance will depend upon actual operating conditions.

The **VANEC** Model 317 Intake Silencer may be mounted either vertically or horizontally.
